listing Description

China Topper Valve Manufacturer Co., Ltd. has been a trusted partner in fluid control valve solutions since its establishment in 1986 in Wenzhou, China. With a production base covering 62,000 square meters, two modern subsidiary factories, and more than 500 skilled employees operating over 200 sets of advanced equipment, we are dedicated to delivering superior valve manufacturing services. Our valves adhere to strict international standards, including ANSI, API, BS, DIN, GOST, and GB. Designed for a wide range of industries such as oil and gas, petrochemicals, refining, chemicals, shipbuilding, power generation, and transmission pipelines, our products play a crucial role in the successful operation of your industrial fluid control systems. We prioritize quality in everything we do, backed by a robust certification portfolio that includes ISO 9001, API Certification, CE Mark, TS Level A1 Certification, ISO 14001 Environmental Management System, and OHS 45001 Occupational Health and Safety Management certifications. These certifications demonstrate our commitment to maintaining high product standards and ensuring safety and environmental responsibility.
